Leo Barros

SWE @ OneShield
Goa, India

Summary

I enjoy dabbling in the intersection of business and tech. Parallelly, I share interests in applied ML towards solving some of medicine's most pertinent problem statements.

Non-profit
I launched a non-profit venture in June 2021 called 'Quarantined Chefs' (www.quarantinedchefs.in), an aggregator of home-based chefs to provide a gentle boost to their business amidst the pandemic. I solely developed, marketed and deployed the platform, which was able to touch 300+ hyperlocal users in 4 days. This platform was awarded at multiple idea competitions and was felicitated by Don Bosco College of Engineering in 2022.

Research interests- Computational Neuroscience
I spent a little over a year working in the domain of computational neuroscience under the guidance of Dr. Basabdatta S Bhattacharya as part of the Brain-Inspired Neural Networks Lab, BITS-Goa. For my final year project, I worked with cutting-edge tools, foraging a unique blend of ML and neuroscience towards the simulation of neuropathology in schizophrenia.

All projects and experiences have been showcased on my portfolio website.

Experience

OneShield
Associate Software Engineer
July 2024 - Present (1 year 6 months)
Goa, India

OneShield provides business solutions for Property & Casualty insurers and MGAs of all sizes. OneShield's SaaS platforms include enterprise-level

policy management, billing, claims, rating, relationship management, product configuration, business intelligence, and smart analytics.

As a developer, I contribute to Product Engineering for our Enterprise platform (OSE). Our team engineers the product to handle business processes leading up to policy creation.

Tech: PL-SQL, OneShield Proprietary Frameworks

Quarantined Chefs
Founder
June 2021 - July 2024 (3 years 2 months)

Quarantined Chefs is a non-profit aggregator of home-based chefs in Goa- the first of its kind in the state
- Strategically migrated from Flask and PostgreSQL to Next.js and Google Cloud, boosting page load times by 40% and reducing server-side rendering latency by 30%.
- Managed marketing from scratch across social media platforms, connecting 30+ home-based chefs with 1000+ customers
- Won several business-idea pitching contests and felicitated by DBCE in 2022

Department of CSIS BITS Pilani Goa Campus
10 months

Undergraduate Thesis Student
September 2023 - May 2024 (9 months)
Goa, India

Worked towards the Computer Simulation of neuropathology in Schizophrenia as part of the research efforts of the BINN Lab

Research Intern
August 2023 - September 2023 (2 months)
Goa, India

Researching the simulation of large-scale brain network models under the guidance of Dr. Basabdatta Sen Bhattacharya

---

Education

Don Bosco College of Engineering, Fatorda, Goa
Bachelor of Engineering - BE, Computer Engineering · (January 2020 - June 2024)

Loyola Higher Secondary School, Margao
· (2018 - 2020)

Vidya Vikas Academy School
High School · (2015 - 2018)

Loyola High School, Margao, Goa, India
· (2008 - 2015)
